

## Why My Virtual CIO?

My Virtual CIO delivers best-practices

in Information Technology and professional project management in a business friendly manner. Our goal is to raise the bar for support providers of all types, specifically creating a stronger fabric of technical expertise for small businesses and the general public to rely upon. Most small to mid size businesses cannot afford their IT needs to consume a lot of their resources.

However, IT

is needed in doing business, more so every single day. Unlike large businesses with more resources and dedicated IT staff, small and mid size systems are maintained and supported as the need arises by outside help or from an employee whose primary role is not IT.

Likewise,

and even more pronounced, are typical IT projects and plans that need to be developed and implemented. These include such things as Disaster Recovery Plans, physical moves, online presence (Web) or e-commerce, budgeting plans for IT, and many others. Projects such as these, fall in to a category not easily handled by part-time support folks or employees. This is usually the domain of high priced consultants who are geared towards engagements with large companies and budgets.

Allow PVSites to be your Virtual CIO at an affordable price and with terms and timelines that will be convenient for you.

- Over 15 years experience
- MBA educated
- Six Sigma trained
- PMP certified
- obsessed with Discovering & Delivering customer needs

Services:
