

Manthe Lawn Care

This is the first site for what is a growing local landscaping business. The need was to get online, providing both contact and services information in an easy and accessible manner, and make the whole thing attractive. In addition to the attractive layout with simple navigation, the site has a strong foundation going forward. While the site may be published, the project is ongoing. An idea we'll be implementing is incorporating video as a mechanism for providing information on materials and process.
